Intro to Workshop Days

Week 2, Day 2

Big Picture

1. Video lecture as homework 
2. Review and discuss
3. Get coding!
4. Regroup at intervals

Review

- Handlebars allows data to be rendered dynamically, using templates, on the server side
- Data: must be shaped carefully into viewData
- Templates: Views and partials (wrapped by main)
 - First toe-dip into file architecture
- Logic: loops and conditionals
- Code from class has been updated to include the homework lecture

The Challenge

- ``server-side-rendering``
- Steps 0-2
- Steps 3 & 4
- Steps 5 & 6
- Steps 7 & stretch

Well-being lunch and afternoon lecture will be at the usual times.

Workshopping

- **Let us know when you're done**
- When most pairs are ready, we'll gather to discuss and share solutions.
It's ok if you haven't finished 100%!
- If you do finish, we'll match you with another pair
 - Talk through your updates and share any curiosities
 - Try to have a question or topic of interest to share
- If you're waiting for another pair, we'll give you some technical stretch
